EDUCATION

Kalasalingam Academy of Research and Education

Bachelor of Technology in Computer Science, CGPA: 9.15

2020–2024

Tamil Nadu, India

TECHNICAL SKILLS

Languages: Java, Python, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, System Design

Software Engineering: REST APIs, API Integration, Debugging, Software Testing

AI & Machine Learning: RAG, LangChain, Machine Learning, NLP, Computer Vision

Backend & Databases: FastAPI, Flask, MySQL

Tools: Git, Docker, Azure DevOps, Android Studio, Postman, Ollama

EXPERIENCE

Accenture

Analyst (Promoted from Associate)

Oct 2024 – Present

Bengaluru, Karnataka

- Modernized enterprise Android software deployed across 15,000+ transit devices by redesigning cloud-integrated data retrieval workflows, improving scalability, maintainability, and reliability of edge-to-cloud communication.
- Designed and implemented REST API integrations between edge devices and cloud services, and debugged production issues involving API synchronization, distributed data consistency, and backend communication.
- Migrated transit card and ticket data retrieval from on-device storage to a secure cloud-based backend, enabling real-time analytics and contributing to a 12% improvement in sales outcomes.
- Developed an internal Retrieval-Augmented Generation (RAG) solution for contextual code understanding across enterprise repositories using Python, semantic retrieval, embeddings, and LLM inference.
- Integrated Azure DevOps repositories with semantic search and designed retrieval pipelines to construct relevant context for LLM-powered code analysis.

Accenture

Software Engineer Intern

Mar 2024 – Jun 2024

Bengaluru, Karnataka

- Built a computer vision pipeline using YOLOv8 and EasyOCR to automate defect detection in transit devices.
- Achieved 88% mAP in object detection and 93% OCR accuracy while reducing manual diagnostics effort by 70%.
- Developed Python-based data processing pipelines for computer vision workflows and optimized TensorFlow Lite models for deployment on Android edge devices.

PUBLICATION

DeTox: A WebApp for Toxic Comment Detection and Moderation

IEEE Conference (TQCEBT-24)

Mar 2024

Christ University, Pune

- Published an IEEE research paper describing a BERT-based toxic comment detection and moderation platform integrated with YouTube APIs for automated content moderation.

PROJECTS

NLP Hub

Python, Flask, NLP

2022

- Built and deployed a Flask-based NLP platform integrating Text-to-Speech, Speech-to-Text, Spam Detection, Sentiment Analysis, Chatbot, and Spelling Correction services.
- Designed modular backend services using Python NLP libraries and deployed the application on Render.

Umbrella Alert

2023

Python, Machine Learning, Flask

- Developed and deployed a Python-based web application to predict next-day rainfall probability using the Rainfall in Australia dataset.
- Achieved an AUC/ROC score of 0.89 using CatBoost, outperforming Random Forest and Support Vector Classifier models.

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (AI-900)
- IBM AI Engineering Professional Certificate

ACHIEVEMENTS

- Promoted from Associate to Analyst at Accenture within 19 months based on project performance and impact.
- Recipient of the Accenture ACE Award for high-impact project contributions.
- Top-5 finish in IBM Hackathon for the Smart Steer autonomous driving project.
